Just learned that the locally based Propel Fuels is offering 5 gallons of free biofuel if you sign up at their web site through July 4th; check out the sign up page. Seems like a great deal if you want to try out their product without putting out any money!

Propel Fuels moved its headquarters to Sacramento from Seattle last year. They have installed E-85 ethanol and B-5 biodiesel pumps at five locations throughout the Sacramento area and are planning to open another location in Placerville soon. Check out their locations page to see which is closest to you.

I'm excited to see someone out here now that provides a consistent supply and good hours.
